August 2010

### **Statement on Bisphenol A (BPA) Free Bottles and Accessories**

There have been many media reports regarding the chemical Bisphenol A (BPA) and Polycarbonate baby bottles and products. The subject of BPA has become a very emotional one and rightly so as it could affect our children. For AdvaCare it is only natural that we have concerned ourselves with this issue.

Please note that all Snookums feeding products are BPA-free. These include all baby bottles, drinking cups, feeding bowls, food storage trays, spoons and snack bowls. Snookums BPA-free feeding products have been filtering into the market since 2009 at no extra cost. Please look out for the BPA-free logo on our packaging.

*Snookums BPA-free Logo*

AdvaCare has also made the decision that all its other Snookums products have to be BPA-free and it is indicated as such on the packaging. Snookums will endeavor to offer our customers the widest possible range, with the latest technology of BPA-free products, at affordable prices.

As a trusted ADVisor we offer parents the sense of security they need to give their children an ADVantage. AdvaCare CAREs about parents and their children, our suppliers, employees, fellow citizens and the environment.

Yours truly,

David Botha
